WE INVEST IN INNOVATIVE TECHNOLOGY COMPANIES THAT ARE ON THEIR WAY TO BECOMING CATEGORY LEADERS

Founded in 2015, our sector expertise and deep network mean that we know, and have worked with, people across the world who can add value to our portfolio companies.

We operate with a single, international structure focused on two core functions: creating value for our portfolio companies by helping them scale and become category winners, and sourcing new investment opportunities.

The team is close-knit and uniquely balanced, including people who know what it takes to build a global company, and what that journey feels like on the inside, people who have worked together for over 20 years as entrepreneurs and investors, and newer members who have brought additional skills on board.

Our team of dedicated country managers are integral to the way in which we help our portfolio companies. They have an unrivalled

business-development network, and outstanding track record, with deep relationships and an ability to super-charge growth across the world via our teams in Singapore, Ho-Chi Minh, Hong Kong, London, Warsaw and Los Angeles.

We want our portfolio companies to attack large and changing market opportunities.

ULab OPERATIONS

Production House

Ulab's development and production team are creating new ways to connect people.

Our projects range from development of ground breaking technologies to mobile apps and platforms.

We draw upon 20 years of experience challenging ourselves to creatively to push the envelope of what's possible.

SOCIAL MEDIA

A seamless care experience for patients and providers establishing one of the world's largest mobile health ecosystems.

Breaking New Ground

- » Unique search technology
- » Live chat with doctors
- » Medical and Treatment Content
- » Secure encrypted communication with devices
- » Access personal medical records
- » Global medical fitness network

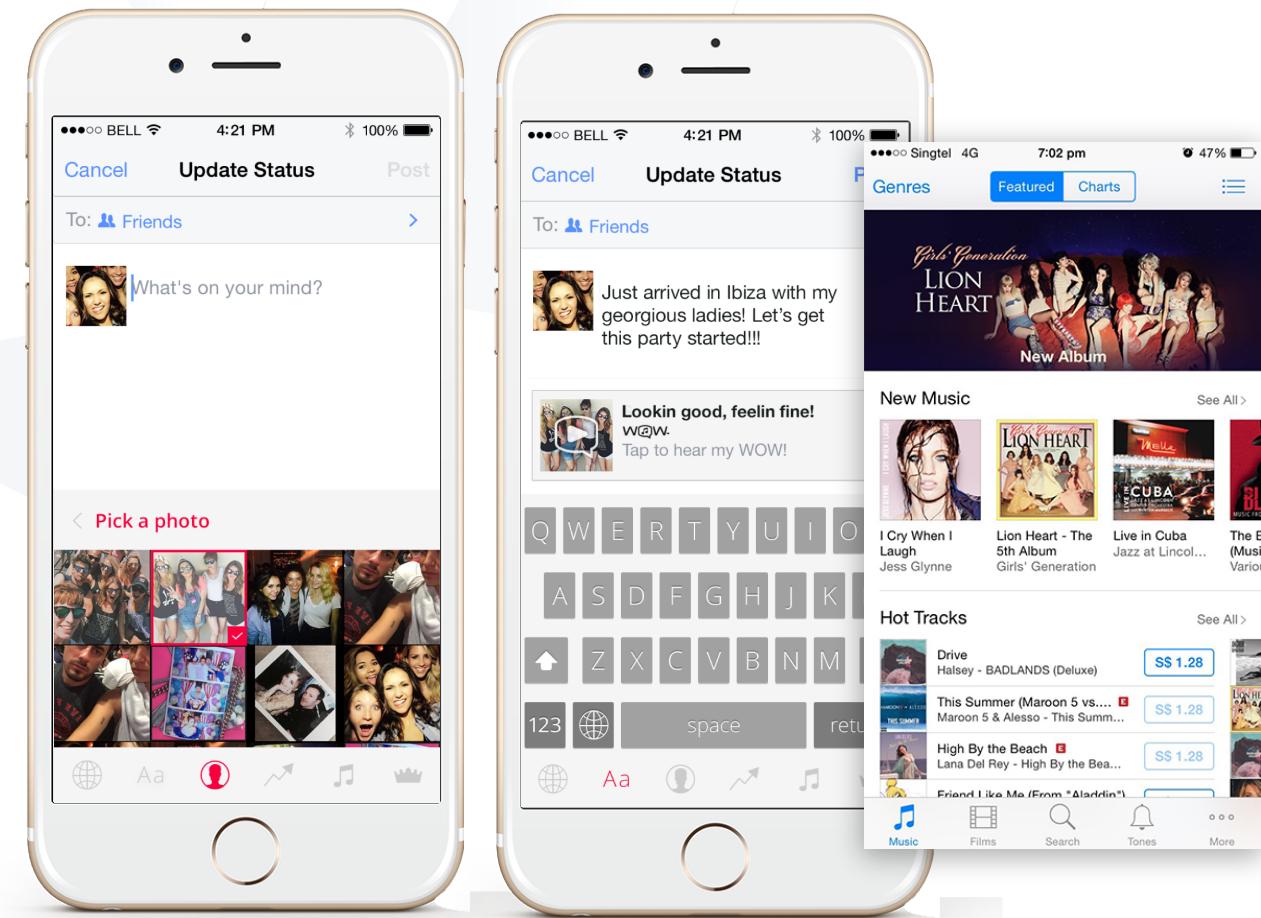

MiLife Medical SDK:

Generating revenue by using 30-second music previews in a creative way with WOW SDK.

WOW SDK allows any mobile application to create, send and play image or video messages accompanied by 30-second music clips. SDK licensee shares the revenue when the end user purchases the whole tune.

WOW SDK

Integrating with WOW SDK is simple - even for a small scale app, the cost of integrating WOW is low and the app can start generating additional profit with just a few lines of code.

Launching December 2015 the most anticipated way to communicate with a massive audience is going to create mobile millionaires every single month -KaChing!

What is Ka-Ching?

- » Mobile Engagement Platform between businesses to consumers.
- » Pull rather than Push.
- » Only ads on demand
- » Targeted messaging, promotions, coupons and e-commerce

Users watch a TV Commercial on the iQNECT app to earn a chance to win the Jackpot.

KACHING SDK

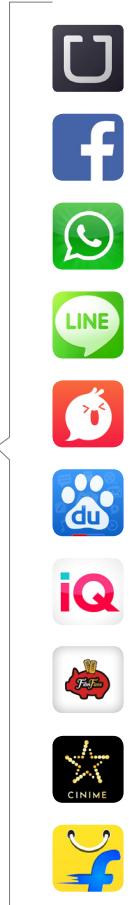

The screenshot shows the Ka-Ching developer center. It features three main sections: 'Register Now as a Developer' with a pencil icon, 'Get API Key' with a key icon, and 'Download Code' with a download icon. Below these are detailed descriptions of the process. To the right, there are separate sections for 'IOS' and 'ANDROID' showing lists of available frameworks or code snippets.

Developers can easily download the Ka-Ching SDK from the website.
